## Fire Safety

A fire could happen at any time. During a fire you may not have the time to learn what to do and there may not be anyone around to tell you what to do.

Knowing what to do in a fire is your responsibly. To help with this, we have provided information about general fire safety below and in Fire Action Notices displayed in corridors and in the Studios.

**Please read this information carefully and familiarise yourself with general fire safety and evacuation routes.**

## On Hearing the Fire Alarm

- Quickly put on suitable clothing, if necessary
- Evacuate the building immediately via the nearest exit route
- Go to the emergency meeting point(s) and stay there if possible, unless instructed otherwise
- Do not stop to collect personal belongings
- If possible close all doors and

- windows behind you
- Do not attempt to use the lift(s)
- Try to alert any other residents you encounter. If they do not evacuate, if possible, pass the details of their location in the building on to a member of staff.
- Exit calmly and quickly but do not run

### **On Discovering a Fire**

- If not already activated, immediately raise the alarm by operating the nearest call point
- Follow the instructions for 'On Hearing the Fire Alarm' above

### **Emergency Meeting Point**

The emergency meeting point is located **on Chalk Farm Road, to the right of the main gates.**

Please refer to the Fire Emergency Plan on the front door of your Studio for more information and a map.

### **Fire Alarm Test**

A fire alarm test will be carried out every Wednesday at 14:00, when the alarm will sound for 15 to 30 seconds. You do not need to evacuate at this time. If alarm sounds longer than this or if it sounds at any other time, you must evacuate the building and go the emergency meeting point.

### **Fire Drills**

We will conduct at least two fire drills without notice during the academic year.

## **Fire Safety Equipment**

### **Fire Detection**

The building has an automatic fire alarm system to help keep you safe. This includes fire detection devices on ceilings that can be activated by heat and smoke.

You should take the following precautions to avoid accidentally setting off the detectors:

- Only cook in the kitchenette area
- If your studio fills with smoke, open the window - avoid opening the door
- Do not use aerosols under or near detectors
- Do not use hair dryers or hair straighteners under or near detectors and ensure that they are unplugged when not in use
- Be careful with the positioning of combustible materials near sockets
- Do not smoke anywhere in the building, including the roof terrace
- Do not bring any prohibited items into the building
- Only use appliances for their intended purpose
- Turn on the shower fan when takes a shower

## Fire Doors

Fire doors are fitted with door closers and seals to limit the spread of fire and smoke.

The doors to your studio, in corridors and stairs are fire doors. You must

- Keep all fire doors closed unless they are designed to stay open
- Not obstruct, wedge or prop doors open
- Not tamper with fire doors or their fittings
- Report all faults with fire doors to Reception immediately

## Firefighting Equipment

Fire extinguishing equipment has been provided in the way of fire blankets in all kitchenettes and fire extinguishers along all corridors and in communal areas. Do not interfere with this equipment or use it maliciously. This equipment is life safety equipment and is for use only in case of fire.

Fire blankets provided in kitchenettes should be used (according to the instructions on the casing) to smother small cooking fires, if it is safe to do so.

Certain areas of the building are fitted with sprinklers. Please do not hang items from these or use heat directly under them.

## Means of Escape

Corridors, lobbies, stairs and fire doors form escape routes in case of fire. Please do not obstruct these with bicycles, personal belongings or rubbish.

## Prohibited Items

If you decide to buy additional cooking appliances, you must ensure that these

are only used in the kitchenette - the use of cooking appliances anywhere else in the studio is prohibited. Any such appliance found plugged in in any other area of a studio will be assumed to be in use and may be confiscated.

## The following items are not permitted and may be confiscated and disposed of if found

- Flammable decorations
- Portable heaters
- Fairy/Christmas tree lights
- Halogen heating equipment
- Candles, incense, oil lamps, outdoor grills or any equipment with an open flame or open coil
- Explosives, firearms, fireworks or ammunition
- Woks and deep fat fryers
- Hookah and shisha pipes

This list is not exhaustive and is subject to change.

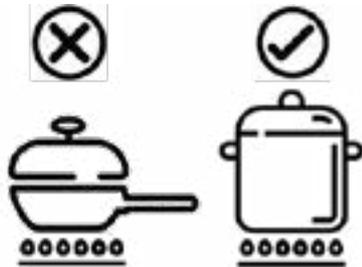

## Safe Cooking Tips

Most residential fires start in the kitchen so take extra care when cooking.

- Only cook in the kitchenette
- Keep cooking appliances and surfaces clean
- Never cook when tired or intoxicated
- Never leave cooking unattended
- Keep flammable items away from surfaces which can get hot
- Use the extractor fan and open the window when cooking
- Do not put metal objects in the microwave
- Keep tea towels and cloths away from cooking surfaces

- Use a pot that is a similar size to the cooking area
- Make sure that the base of your cookware is smooth and sits flat against the stove top

- Double check that cooking appliances have been turned off once you've finished cooking

### Electrical Safety

The UK electrical supply is 230 Volts (not 110 Volts). You should only use electrical appliances purchased from a reputable UK retailer as far as possible. If you need to use appliances with a different voltage, you must use an appropriate converter.

Additionally, you should not

- Use non-UK plugs
- Use faulty electric equipment (eg with frayed or burnt cords)
- Use 'daisy chain' adaptors and extension cords or cubed adapters
- Plug items such as hairdryers or kettles into an extension lead
- Allow electrical cords to trail across floors
- Use un-fused appliances
- Exceed a load of 13 amps per socket. Use this website to learn about the effect of plugging different combinations of electrical equipment into an extension lead [www.twothirtyvolts.org.uk/socket-overload/](http://www.twothirtyvolts.org.uk/socket-overload/)
- Do not use appliances if you are unsure of their instructions. If you are unsure about how to use any appliance provided by us, please ask a member of staff for assistance.

24/7

We want you to enjoy your time living with us. However, there may be times we don't get things right. If this happens, we'd like your feedback and an opportunity to make them right.

The complaints procedure below applies to all residents, potential residents and previous residents (for up to six months the end of your Licence Agreement), however Stage 3 of the Formal Complaints procedure (raising a complaint to the National Codes Administrator) is only applicable to students.

## **Confidentiality**

All necessary enquiries and disclosures will be made to investigate the complaint properly and to collect appropriate information from all the parties and witnesses involved. Except for that purpose, all parties to a complaint must treat the complaint and related documentation confidentially and in line with The Stay Club Privacy Notice.

## **Informal Complaints**

If you have a minor complaint, where appropriate, your first step should be to discuss your concern in person with a Reception member of staff to try and resolve the matter. While it isn't always possible for us to change processes, we will try to put things right for you and find the best possible solution.

If we cannot resolve your complaint immediately, we will aim to send you an initial response within 2 working days. If we feel we need more time

or information to investigate your complaint, we will keep you informed.

### **Formal Complaints**

We hope that most complaints can be dealt with amicably and to your satisfaction using the informal complaints procedure, as such, in the first instance, where appropriate, issue your complaint via the informal procedure. However, we understand that some complaints may be of a serious nature or cannot be appropriately raised to Reception staff. If this happens, please follow the Formal Complaints process below.

If you would like to escalate an informal complaint to a formal complaint, you should do this within 2 weeks of raising your informal complaint.

#### **Stage 1**

Please submit your complaint in writing to the relevant Community Manager of the residence you live in or are due to live in. Please note that Formal Complaints must be submitted in writing. Your complaint will be acknowledged within 2 working days and will be responded to fully within 5 working days of the receipt of the complaint. If we feel we need more time or information to investigate your complaint, we will keep you informed.

#### **Stage 2**

If, after communicating with the relevant Community Manager, you feel that your complaint has not been resolved to a satisfactory level, you may request that your complaint is reviewed by a Stay Club Complaints Review Panel. This request must be sent in writing to the aforementioned Community Manager, who will then convene the panel. Your request will be acknowledged within 2 working days and will be responded to within 10 working days of the receipt of the request.

#### **Stage 3**

If, once the decision made by the Complaints Review Panel has been given to you and you believe the complaint has not been dealt with fairly or remains unresolved, you can consider submitting your complaint to the Nation Codes Administrator. Full details of this process can be found at [/ www.nationalcode.org/](http://www.nationalcode.org/).
